MARGUSA

Natural body detox

CLINICAL INDICATIONS:

- effective detoxification of the body by eliminating metabolic waste products and toxins;
- neutralization of free radicals ensuring the cell protection from oxidative stress and degenerative processes;
- general anti-inflammatory;
- maintaining the health of the skin, giving it a natural and healthy look;

Suggested use:

Children: half a tablet twice a day, 30 minutes before main meals, in 30-day cures, followed by a 10-day break.

Adults: 1-2 tablets 2-3 times a day, 30 minutes before main meals, in cures of 30-60 days.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Storage conditions: in its own packaging. Store at room temperature, away from heat, moisture and light.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Azadirachta indica (Neem), leaf extract (10:1) - 200 mg;
Azadirachta indica (Neem), leaf powder- 150 mg.

Neem is a very popular plant in the Ayurvedic system, also called the "tree of life". The leaves are rich in bioactive substances that support the body's immune system and antioxidant system. Supports liver function and the elimination of toxins from the blood. It is an antibacterial, antifungal and anti-inflammatory effective in skin diseases (acne, eczema, burns, skin ulcers) and the osteo-articular system. Increases glucose utilization and glycogen deposition in the liver, muscles or heart.

Reduces total blood lipids, providing cardiovascular protection (stops atherogenesis). Contains nimbin, nimbidin, nimbidol, gedunin, queceretin, salannin, azadirachtin.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, compaction agent, stabilizer.

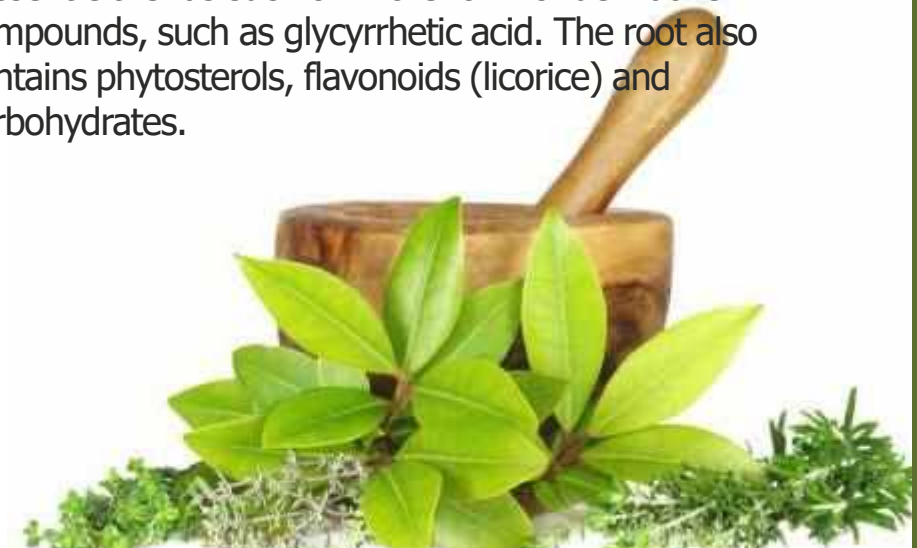

Glycyrrhiza glabra (Licorice), root powder - 100 mg.

Bioactive substances have a mild laxative effect and support the restoration of the gastrointestinal mucosa. It contains glabridin, a polyphenolic flavonoid that reduces melanogenesis and inflammatory processes in the skin.

Glabridin suppresses the formation of fats and supports the enzymes involved in the metabolism of fats in the liver. Supports increased estrogen levels and female hormonal balance at menopause.

Phytonutrients also help maintain the health of the respiratory system. The root contains triterpene saponins, the most important of which is glycyrrhizin, present either as such or in the form of derivative compounds, such as glycyrrhetic acid. The root also contains phytosterols, flavonoids (licorice) and carbohydrates.

TRIFYLA

Three fruits for the digestive balance

CLINICAL INDICATIONS:

- maintaining the health of the digestive system;
- maintaining a normal intestinal transit, the intestinal flora, ensuring detoxification of the colon;
- normalization of digestion, secretion of intestinal enzymes and bile flow;
- supporting the ability to attach by stimulating immunity and protecting cells against oxidative stress

Suggested dose:

Children 5-14 years: half a tablet 3 times a day;
Teenagers and adults: 1-2 tablets 3 times a day.
It is administered 30 minutes before main meals, at least 1 month, optimally 3 months cure.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Store at room temperature, away from heat, moisture and light. Food supplements do not replace a varied and balanced diet and a healthy lifestyle.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Emblica officinalis (Amla), fruit powder - 150 mg. It supports the immune system by forming white blood cells and antibodies that are involved in the fight against bacterial and viral infections. Due to its composition, the fruits have strong antioxidant properties, protecting the body from oxidative stress and degenerative processes. It also supports digestion and detoxification, maintaining health, vitality and longevity. It has a very high content of vitamin C and other essential phytonutrients.

Terminalia chebula (Haritaki), fruit powder - 150 mg. The most important bioactive constituents of the fruit are tannins. Normalizes intestinal transit, reduces bloating and associated abdominal pain. Stimulates the elimination of toxins from the colon, thus purifying the body naturally. It stimulates the appetite, the hepatobiliary system and is an adjunct in weight loss. The complex of bioactive substances (tannins, flavones) fights free radicals formed in metabolic processes, supporting the body in case of oxidative stress. Contains tannins, anthraquinone, chebulinic acid, chebulagic acid, chebulic acid, ellagic acid and gallic acid.

Terminalia bellerica (Bibhitaki), fruit powder - 150 mg. Supports lipid metabolism, ensures the normalization of gastric acidity and the integrity of the gastric mucosa. It regulates the appetite and the hepatobiliary system, being an adjunct in weight loss. The fruit contains tannins, arabinose, fructose, sucrose, rhamnose and amino acids, triterpenes, retinoic acid, arjugenin, arjunolic acid, etc.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, used as a compacting agent, stabilizer.

ASHWAGANDHA Rasayan Tab

Everlasting youth

CLINICAL INDICATIONS:

- General toner, refreshing, energizing the body in conditions of physical and mental stress and during convalescence;
- neuroprotective, regulator of physiological biorhythm;
- detoxifying, antitumor.
- regenerating, rejuvenating, immunostimulating;
- adaptogenic, psycho-emotional and hormonal rebalancing;

Suggested dose:

Adults: 1-2 tablets 3 times a day

Children up to 14 years: - ½ tablets 3 times a day.

As dietary supplement, half an hour before meals or one hour after meals, optimal for 3 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Store in the original package at room temperature and away from light and heat.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Withania somnifera (Ashwagandha),

Root powder - 300 mg.

exerts its medicinal effect due to steroidal lactones and alkaloids. These act as hormonal precursors that can be used by the body to convert into human physiological hormones when required. Glycosides of Withania somnifera (sitoindosides VII and VIII) have significant antistress activity.

According to research, the active ingredient, Withaferine-A, takes part in antibiotic and antitumor activities.

Asparagus racemosus (Shatavari),

root powder - 50 mg.

It has tonic, aphrodisiac properties, balances the hormonal system and supports fertility. Contains shatavarin, steroidal saponin, shatavarol, racemozide, ursolic acid.

Acacia arabica (Guma arabica - excipient) - 50 mg.

It is a natural polysaccharide, compaction agent, stabilizer.

Chlorophytum arundinaceum

(Safed musli), root powder - 100 mg.

It has an immunomodulatory, stimulating and tonic effect, antistress, adaptogen, antioxidant, antimicrobial, antimutagenic, antiulcer, antitumor, aphrodisiac, galactogenic, antidiabetic. It is a rich source of alkaloids (over 25), vitamins, proteins, carbohydrates, steroids, saponins, potassium, calcium, magnesium, phenol, resins, mucilages and polysaccharides and also contains a large amount of simple sugars, mainly sucrose, glucose, fructose, galactose, mannose and xylose.

SPIRULINA STAR

Supports total health

CLINICAL INDICATIONS:

- supports the health and vitality of the whole body by supplementing the body's nutritional and energy needs;
- through the rich intake of proteins, vitamins and minerals it completes the nutritional and energetic need of people with special diets (low calorie, vegetarian, athletes, young and old);
- increases the capacity for physical and intellectual effort in the stressful conditions of the daily environment;
- maintaining the body's tone by supporting the detoxification process;
- supports the immune system, protecting the body from oxidative stress and degenerative processes;
- is recommended in recovery periods after various conditions, during and after radiotherapy and chemotherapy.

Suggested dose:

Children: half tablet 3 times per day, half an hour before meals;

Adulți: 1-2 tablets 3 times a day, half an hour before meal.

It is administered 30 minutes before a meal for at least 30 days, optimally for 3 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. Store at room temperature, away from heat, moisture and light. Food supplements do not replace a varied and balanced diet and a healthy lifestyle.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Spirulina platensis (Spirulina) - 225 mg;

It is a valuable source of vitamins, minerals, essential amino acids and enzymes needed by the body to compensate for deficiencies due to an unbalanced daily diet. Algae contain natural iron and vitamin B12, which have an antianemic effect, especially for children and the elderly, in whom anemia can cause major disturbances in the body's functioning.

Spirulina helps to achieve physical and intellectual performance and to increase sports performance.

Spirulina lowers serum levels of total lipids, cholesterol and blood sugar in diabetics. Spirulina regulates digestion, helps maintain the intestinal flora and, through the intake of plant fibers, maintains intestinal transit.

Chlorophyll and phycoceanin pigments have an important chelating effect for heavy metals, helping to detoxify the blood and liver. Administered half an hour before a meal reduces appetite, helping to reduce body weight and combat obesity. Due to the high iodine content, spirulina contributes to the optimal functioning of the thyroid gland, regulating metabolic processes and some cases of thyroid hypofunction.

Spirulina is also the ideal supplement for lacto-vegetarian diets or other restrictive diets, easily assimilable proteins providing all the necessary essential amino acids. Spirulina increases endurance by stimulating the body's defense system. It contains pure protein, contains eight essential amino acids (isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan and valine).

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, used as a compacting agent, stabilizer.

Withania somnifera (Ashwagandha),

root powder - 225 mg.

Root phytonutrients have an adaptogenic effect, contribute to general toning and normal physical and mental performance in conditions of stress and fatigue and slow down aging. It is neuroprotective, strengthens nerve structures, improves concentration and memory. Supports the immune system and the endogenous antioxidant system, increases endurance and helps the body adapt to environmental conditions. Contains alkaloids and steroid lactones: withanin, withanferin, somniferin, somnin, somniferinin, withaninin, pseudo-withanin tropane, pseudo-tropin, choline, anaferin, anahydrin, isopelletierinin.

HAPPY KID Syrup

For happy and healthy children

CLINICAL INDICATIONS:

- increases immunity;
- maintains a normal appetite and optimal assimilation of food nutrients;
- maintains a normal intestinal transit and eliminating toxins;
- supports the health of the respiratory system, digestive system and the body's natural capacity for self-defense;
- helps to rapid recovery after convalescence;
- the harmonious physical and mental growth and development of the child.

Suggested dose:

Children 6-12 months: 1 teaspoon per day for minimum 30 days

Children 1-4 years: 1-2 teaspoon per day for minimum 30 days;

Children 4-12 years: c1-3 teaspoons per day for minimum 30 daysi.

As dietary supplement, half an hour before meals or one hour after meals.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects or side effects at the recommended dose and use. Store in the original package at room temperature, away from light and heat. After opening, store in the refrigerator and consume within 60 days. The effect is stable over time. Food supplements do not replace a varied and balanced diet and a healthy lifestyle. Not recommended for diabetics. Contraindicated for people allergic to bee products.

Servings per container: 100 ml syrup.

Ingredients/5 ml sirop:

Elettaria cardamomum (Cardamom), seeds (6:1) - 200 mg.
Cardamom contains copper, iron, riboflavin, vitamin C and niacin. Its role is to improve blood circulation to the lungs. Helps relieve symptoms in case of asthma, cold or cough. Cardamom helps improve digestion, reduces inflammation in the stomach, reduces digestive burns and fights nausea.

Embelia ribes (Vaividang), fruits (10:1) - 200 mg.
Tonic effect - digestive and reducing flatulence, promotes elimination of intestinal parasites.

Glycyrrhiza glabra (Lemn dulce), roots (5:1) - 200 mg. The extract helps the normal functioning of digestion and maintains normal intestinal transit. Contains triterpene saponins, phytosterols and flavonoids, glucose, fructose and sucrose.

Bacopa monnieri (Brahmi), aerial parts (8:1) - 200 mg.
It is a plant known since ancient times in Ayurvedic medicine that helps improve brain functions (memory, perception, concentration) and the nervous system in children. Contains alkaloids, brahmin, herpes, saponosides, betulic acid, beta sitosterol, stigmasterol, heptacosan, mono and octo-cosan, dotriacontane, nicotinic acid, 7-glycosides, alpha-alanine, aspartic acids, glutamic acid and serine.

Aegle marmelos (Bael), fruits (6:1) - 200 mg.
The fruit extract helps the normal functioning of the intestinal transit and maintains the health of the digestive system. Contains aegelin, rutacin, marmelosin (coumarin).

Carum carvi (Caraway), fruits (4:1) - 200 mg.
It helps the normal functioning of digestion, intestinal transit and the reduction of abdominal flatulence. Contains volatile oil, lipids, protein substances, minerals, starch, carbohydrates, tannins, mineral salts, etc.

Adhatoda vasica (Vasa), leaves (3:1) - 200 mg.
Maintains the health of the respiratory system, fluidifies bronchial secretions and stimulates their elimination. It is a good immunostimulator. Contains alkaloids, vasicin, vasicin N-oxides, vasicinone, deoxyvasicin, oxivasicinin, essential oils.

Thymus vulgaris (Thyme), aerial parts (10:1) - 200 mg. It helps maintain the fluidity of bronchial secretions, the normal functioning of digestion and the neutralization of free radicals. Contains 1-2% volatile oil, saponosides, ursolic acid, oleanolic and caffeic acid, flavonic derivatives, triterpene sterols, etc.

Citrus medica (Lemon), fruits (6:1) - 200 mg.
Fruits help maintain the health of the digestive system and eliminate excess water from the body. It is an antioxidant and immunomodulator, general tonic. Contains citric acid, malic acid, calcium citrate, sodium and potassium. Mineral substances: phosphorus, iron, silicon, manganese, copper, calcium. Vitamins: A, B1, B2, B3, D, E, PP.

Mentha piperita (Mint), aerial parts (5:1) - 200 mg. It is a source of B vitamins, calcium and potassium, which help stimulate the immune system. Contains volatile oils that improve digestion, support intestinal transit, reduce bloating and flatulence.

Honey - 200 mg.
Sodium benzoate - 25 mg.
Sugar - 2400 mg.
Demineralized water – up to 5 ml.

COUGHEND Syrup

For respiratory system health

CLINICAL INDICATIONS:

- mild bronchodilator, decongestant by fluidizing mucous secretions from the respiratory tract;
- respiratory tract protector, anti-inflammatory, antihistamine, immunostimulator, immunomodulator;
- indicated in all forms of inflammatory respiratory diseases;
- effective in all forms of cough;
- excellent in the prophylaxis of bacterial, fungal, and viral respiratory infections.

Suggested dose:

Children 1-3 years: half a teaspoon (2.5 ml) twice a day;

Children over 3 years: one teaspoon (5 ml) twice a day;

Adults: 1-2 teaspoons (5-10 ml) 2-3 times a day.

It is taken 30 minutes before a meal or one hour after a meal.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. Store in the original package at room temperature and away from light and heat. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. After opening, store in the refrigerator and consume within 60 days. The effect is stable over time. For people with diabetes, COUGHEND Sugar-Free Syrup is recommended.

Servings per container: 100 ml syrup.

Ingredients/5 ml syrup:

Pistacia integerrima (Karkatshringi), fruits(4:1) - 150 mg.

The active principles in the plant have an expectorant, decongestant, general tonic effect. Contains pistagremic acid, tannins, monoterpenes, triterpenoids, sterols and flavonoids.

Adhatoda vasica (Vasa), leaves (3:1) - 150 mg.

The leaves contain alkaloids, quinazolines, vasicins, mayonnaise, essential oils. They have a tracheal muscle relaxant, bronchodilator, antihistamine, fluidizing bronchial secretions.

Piper longum (Indonesian pepper), fruits (3:1) - 75 mg.

Contains a large number of alkaloids, lignans, essential oils, with antifungal, antiamebian, antimicrobial, antitussive, antiasthmatic, cardioprotective, antioxidant, analgesic, anti-inflammatory, immunomodulatory, antiulcer, hepatoprotective.

Cyperus rotundus (Nagarmotha), rhizome (6:1) - 75 mg.

Contains alkaloids that have been shown to have antibacterial activity.

Ocimum sanctum (Busuioc indian), aerial parts (5:1) - 75 mg.

The seeds are rich in mucilages. The extract from the aerial parts of the plant generally contributes to the health of the respiratory tract, supports lung function. It has a bronchodilator and expectorant effect, antiallergic, decongestant. Contains volatile oil anethole, beta-sitosterol, triterpene saponosides and tannins.

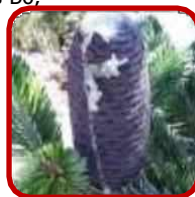

Glycyrrhiza glabra (Licorice), root (5:1) - 75 mg.

It has a decongestant, anti-inflammatory, antispasmodic, respiratory draining, calming effect. Effective in dry cough but also productive. Contains triterpene saponins, phytosterols and flavonoids (licorice), glucose, fructose and sucrose.

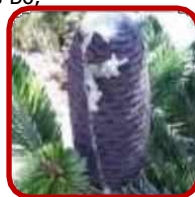

Zingiber officinale (Ginger), rhizome (6:1) - 75mg.

It has an expectorant, antihistamine, decongestant, diaphoretic, emollient effect on the respiratory mucosa. Contains gingerol, essential oils, phenols, starch, mucilages, resins, potassium, zinc, calcium, copper, magnesium and vitamins B6, C and D.

Abies webbiana (Talispatra), leaves (8:1) - 75 mg.

It has a bronchodilator, anti-inflammatory, fluidizing effect of bronchial secretions. Contains aziridine, monoterpenes, flavonoids, phytosterols and diterpene glycosides.

Solanum xanthocarpum (Kantakari), aerial parts (5:1) - 75 mg.

It has antitussive, antihistamine, anti-inflammatory, thermoregulatory effect. Contains solanocarpine, carpesterol, potassium nitrate, sitosterol, isochlorogenic acid, neochlorogenic acid, chronogenic acid, caffeic acid, quercetin, apigenin.

Cinnamomum zeylanicum (Cinnamon), bark (10:1) - 75 mg. It

has antitussive, antihistamine, anti-inflammatory, antipyretic effect. Contains aldehydes, tannins, flavonoids, glycosides, terpenoids, anthraquinones.

Piper nigrum (Black pepper), fruits (6:1) - 75mg.

It has an antimicrobial, carminative, digestive, analgesic, antipyretic, antioxidant, vasodilator, galactogog effect, stimulates circulation, hepatoprotector, gastroprotector, sialagogue, behic, antiasthmatic. Contains volatile oil, piperine, piperetin, alkaloids, flavonol glycosides, sterols and polysaccharides.

Viola odorata (English violet), aerial parts (5:1) - 75 mg. It has a

decongestant, antispasmodic, airway drain, calming effect. It also has an antimicrobial, tonic, antioxidant, analgesic, anti-inflammatory effect. Contains aliphatic aldehydes and alcohols, eugenol, resins, sugars, salicylic acid, mucilages, minerals.

Sarcostemma brevistigma (Somlata), aerial parts (5:1) - 75 mg. Contains malic acid, succinic acid, sugar, sucrose, tannins, phytosterols, resins with antiasthmatic, bronchodilator, antiallergic effect on the respiratory system.

Mentha piperita (Mint), aerial parts (4:1) - 25 mg. Contains a large amount of volatile oils, polyphenolic substances, tannins, flavonoids and bitter principles. It has spasmolytic, antiseptic, analgesic and decongestant antimicrobial, radioprotective, antiemetic, digestive, diuretic effect of the respiratory tract.

Cinnamomum camphora (Camfor), bark (15:1) - 24 mg.

It has analgesic, antidepressant, anti-inflammatory, antiseptic, antipyretic, general tonic, sweating effect. Contains pinene, camphor, linalool, bornyl acetate, terpinen-4-ol, caryophyllin, borneol, piperiton, geraniol, safrole, aldehyde.

Calcined sodium borate - 65 mg. It has an expectorant effect, beneficial in productive cough.

Sodium benzoate(preservative) - 25 mg;

Sugar - 2400 mg;

Sorbitol 70% - 3000 mg (only for **COUGHEND** Syrup sugar free);

Demineralised water up to 5 ml.

LIVECOM Syrup

Natural liver protector

CLINICAL INDICATIONS:

- hepatoprotector, liver regenerator;
- hepato-biliary drain and detoxifier;
- adjuvant in hepatitis and other hepatobiliary diseases, consumptive diseases, intoxications;
- digestive, antiasthenic, antioxidant, general tonic;
- adaptogen for stressful situations overload, fatigue, convalescence.

Suggested dose:

Children 1-5 years: one teaspoon a day;

Children 6-14 years: a teaspoon 2-3 times a day;

Teenagers and adults: 1-2 teaspoons 2-3 times a day.

It is administered 30 minutes before a meal. It is administered for at least one month, optimally 3 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects or side effects at the recommended dose and use. Store in the original package at room temperature room and avoid light and heat. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. LIVECOM SUGAR-FREE SYRUP is recommended for diabetics. After opening, store in the refrigerator and consume within 60 days.

Servings per container: 100 ml syrup.

Ingredients/5 ml syrup:

Picrorhiza kurroa (Kutki), root (4:1) - 100 mg.
It has a hepatoprotective effect, detoxifying, hepato-biliary drain, protective against hepatitis viruses, immunomodulator, antioxidant. Contains D-mannitol, kutkiol, kutkisterol, apocyanin, androsim and glycosides, arvenin.

Terminalia chebula (Haritaki), fruits (4:1) - 100 mg.
Contains chebulic acid, neochebulic acid, chebulosides that have hepatoprotective properties through antioxidant effect and stabilization of the liver cell membrane.

Emblica officinalis (Amla), fruits (4:1) - 50 mg.
Supports lipid metabolism, detoxification processes in the liver and maintains the normal functioning of the intestinal transit. The most important bioactive components of the plant are tannins, anthraquinones, chebulinic acid, chebulagic acid, chebulic acid, ellagic acid and gallic acid.

Andrographis paniculata (Kalmegh), aerial parts (10:1) - 100 mg.
Contains andrographolides. It has a choloretic, digestive, hepatoprotective action.

Boerhavia diffusa (Punarnava), root (8:1) - 50 mg.
Contributes to increasing bile flow, supporting the process of digestion and elimination of toxins, maintains liver enzymes at a normal level and stimulates the mechanisms of liver cell regeneration. It contains a large number of compounds: flavonoids, alkaloids, steroids, triterpenoids, lipids, lignins, carbohydrates, proteins and glycoproteins, boeravinone, punarnavin, ursolic acid, punarnavozide, lyododendrin and a glycoprotein.

Eclipta alba (Bhringaraj), aerial parts (10:1) - 50 mg.
It has regenerating effects, supports the functions of the liver and the natural elimination of toxins from the liver. Contains cumestane, wedelolactone and desmethyl wedelolactone. It also contains ecliptic, α -formyltertienyl, triterpenes such as saponin, eclalbatin.

Phyllanthus urinaria (Bhumyamalaki) aerial parts (10:1) - 50 mg.
It is hepatoprotective, maintains the integrity of hepatocytes and protects the cell membrane due to inhibition of the lipid peroxidation process. Maintains the normal level of liver enzymes involved in intermediate metabolism and supports liver detoxification. Inhibits hepatitis B virus replication (inhibits DNA polymerase). Contains corilagin, rutin, brevifolin carboxylic acid, isotrictinin, geranin, gallic acid and ellagic acid.

Tinospora cordifolia (Guduchi), stem (10:1) - 50 mg.
It is antispasmodic, anti-inflammatory, antioxidant, antiallergic, hepatoprotective, immunomodulatory and antineoplastic. Contains polysaccharides and alkaloids, diterpenoids, steroids, glycosides, polyphenols, sesquiterpenoids and aliphatic compounds.

Fumaria officinalis (Fumitory), părți aeriene (10:1) - 50 mg.
Supports the secretion and elimination of bile contributing to the digestion process. The diuretic-depurative effect helps to eliminate toxins naturally from the body. Contains fumaric acid, alkaloids and their derivatives, tannin, resins, flavones, bitter substances, mucilages and potassium mineral salts.

Silybum marianum (Milk thistle), fruits (4:1) - 50 mg.
It contributes to maintaining the integrity of the liver cell, to the normal functioning of the liver cell membrane. Stimulates the recovery of hepatocytes, protects the liver against various toxins (alcohol, hepatotoxic drugs, toxins) and supports the physiological process of detoxification. Contains silymarin.

Aloe barbadensis (Aloe), leaves (3:1) - 50 mg.
Supports the health of the digestive and hepatobiliary system, the normal functioning of the intestinal transit and the natural elimination of toxins from the body. Contains anthronic compounds, heterosides or aglycones, resins, chromic derivatives, aglycones and C - Glycosides. It also contains vitamins (A, B1, B2, B6, B12, C and E) and minerals (iron, calcium, magnesium, copper, chromium, iodine, selenium, manganese, zinc). Other substances present in the Aloe leaf are sterols (cholesterol, sitosterol, campesterol, lupeol), hormones (auxins and gibberellins), lignin and saponins.

Tecoma undulata (Rohida), bark - 50 mg.
The plant is especially useful in ascites with hepatosplenomegaly. It helps to purify the blood and has a beneficial cholagogue effect in liver pathologies. Contains tecomine (beta glucoside veratril), alkanes, alkanols and beta-sitosterols.

Sodium benzoate (preservative) - 25 mg.

Sugar - 2400 mg.

Sorbitol 70% - 3000 mg (only for LIVECOM sugar free syrup)

Demineralised water – up to 5 ml.

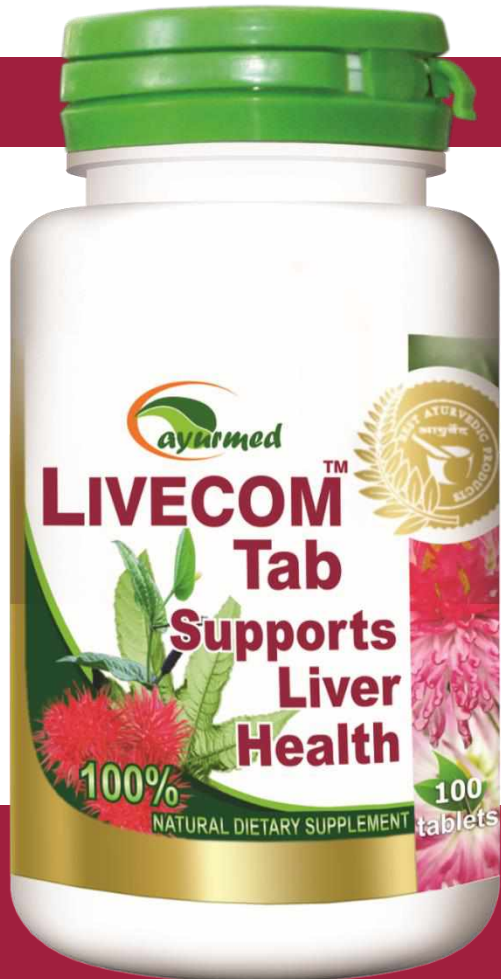

57th, Drumul Cooperativei Street, District 5 Bucharest – Romania

LIVECOM Tab

Hepato-biliary protection and regeneration

CLINICAL INDICATIONS:

- maintains the health of the liver, spleen and blood composition in the conditions of an unbalanced diet or in the presence of substances with hepatotoxic potential (alcohol, drugs, etc.);
- supports the liver in the processes of metabolism and elimination of toxins;
- protects liver cells against oxidative stress and hepatitis viruses;
- restores the damaged liver cells and the appearance of new cells by stimulating protein synthesis;
- supports the digestion process and the assimilation of nutrients thus contributing to the health and vitality of the body;
- supports the body in situations of stress, overload, fatigue, convalescence.

Suggested use:

Children 5-14 years: 1-2 tablets a day;
Teenagers and adults: 1-2 tablets 3 times a day. It is administered 30 minutes before a meal, at least one month, preferably 3 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects or side effects at the recommended dose and use. Store in the original package at room temperature and away from light and heat. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Picrorhiza kurroa (Kutki), root - 100 mg. It has a hepatoprotective, hypocholesterolemic, antioxidant effect. Contains D-mannitol, kutkiol, kutki-sterol, apocyanin, phenol glucosides, androsim and glycosides picein iridoid, kutkin, picrozide I, II and III, kutkozid, minecozide, picrorhiza, arvenin, etc.

Andrographis paniculata (Kalmegh), aerial parts (10:1) - 100 mg. Supports digestive function by increasing bile flow and maintaining liver enzyme activity. Contains andrographolide (labdana diterpenoida).

Eclipta alba (Bhringaraj), aerial parts (10:1) - 100 mg. It has regenerating effects, supports the functions of the liver and helps to eliminate toxins from the liver naturally. Contains cumestanes wedelolactone and desmethyl wedelolactone as main components. It also contains ecliptic, α -formyltertienyl, triterpenes such as saponin, eclalbatin.

Phyllanthus urinaria (Bhumyamalaki), aerial parts (10:1) - 100 mg. Maintains the integrity of hepatocytes and protects the cell membrane due to inhibition of the lipid peroxidation process, the normal level of liver enzymes involved in intermediate metabolism and liver detoxification. Inhibits hepatitis B virus replication (inhibits DNA polymerase). It promotes the production and elimination of bile, preventing the formation of gallstones. Contains corilagin, rutin, brevifolin carboxylic acid, isotrictinin, geranin, gallic acid and ellagic acid.

Piper longum (Indonesian pepper), fruits - 25 mg. It contributes to the absorption of nutrients in the digestive tract and promotes intestinal transit. It is a general tonic, helps to protect the body against oxidative stress and to adapt it to the stressful conditions of the living environment. Contains a large number of alkaloids and related compounds, lignans, sesame, pulvuatilol, fargesin, essential oils.

Mandur bhasma (iron oxide) - 25 mg. It is a natural iron that ensures the formation of healthy red blood cells (antianemic) and helps maintain iron reserves in the liver and spleen.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, compaction agent, stabilizer.

WORM END Sirop

Naturally eliminates intestinal parasites

CLINICAL INDICATIONS:

- combating intestinal parasitosis caused by: helminths (tapeworms, pinworms, earthworms), protozoa (Giardia lamblia, Cryptosporidium, Blastocystis hominis and Microsporidia);
- acts by inhibiting the motility of parasites and eliminating them from the body due to the laxative effect;
- elimination of unpleasant manifestations (nausea, vomiting, indigestion, weight loss, altered intestinal transit, irascibility) caused by the presence of intestinal parasites;
- restoring the frequency and consistency of the seats,
- elimination of gases and toxins from poor digestion

- recovery from weakness caused by the presence of intestinal parasites by supporting a normal appetite, digestion and intestinal transit.

Suggested use:

Children 1-3 years: 2.5 ml, 2-3 times a day;

Children 3-12 years: 5-10 ml, 2-3 times a day;

Children over 12 years and adults: 5-10 ml, 3 times a day;

It is administered 30 minutes before a meal.

It is used in 3 installments of 10 days each with a break of 10 days between them.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects or side effects at the recommended dose and use. Store in the original package at room temperature, away from light and heat. After opening, store in the refrigerator and consume within 60 days. The effect is stable over time. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Contraindicated for people with diabetes. Contraindicated for people allergic to the components of the product.

Servings per container: 100 ml syrup.

Ingredients/5 ml syrup:

Embelia ribes (Vaividang), fruits (10:1) - 200 mg.
It promotes the elimination of intestinal parasites by paralyzing the nervous system of worms and eliminating them due to the mild laxative effect of fruits. Supports appetite and digestion.

Holarrhena antidysenterica (Kutaj), bark (10:1) - 200 mg.
It is astringent, antidiarrheal, anthelmintic, antibacterial, digestive, stomachic, antipyretic and tonic.
Contains alkaloids, conessine, conessimine.

Coriandrum sativum (Coriandru), fruits (10:1) - 200 mg.
Maintains digestion, intestinal peristalsis and facilitates the elimination of intestinal gas. Maintains normal liver activity and bile secretion. Supports the elimination of toxins from the blood to the kidneys by increasing diuresis. The fruit contains volatile oil consisting of: d-linalool or coriandrol, geraniol, cimol, pinen, terpinen, felandren, dipentene, petroselinic acid, lipids, starch, minerals, pectins, etc.

Emblica officinalis (Amla), fruits (4:1) - 200 mg. It is an antioxidant, anti-inflammatory and general tonic.
Fruit juice contains the highest concentration of vitamin C.
(478.56mg / 100 ml) and hydrolyzable tannins.

Piper longum (Indonesian pepper), fructe (3:1) - 200 mg.
Piper longum supports the immune system by helping to eliminate parasites naturally. Regulates digestive functions and combats the discomfort associated with parasitosis: anorexia, indigestion, flatulence, abdominal pain. Piper longum fruit contains a large number of alkaloids and related compounds, of which the most abundant is piperine.

Ocimum sanctum (Indian basil), aerial parts (5:1) - 200 mg. It is a gastric protector, effective in digestion and absorption of nutrients from food. The volatile oil facilitates the elimination of intestinal parasites. Contains volatile oil with various chemical compounds including o-pinene, camphene, b-pinene, myrcene, limonene, cis-cymene, camphor, linalool, methyl chavicol, γ -terpineol, citronellol, geraniol, methyl cinnamate and eugenol. It also contains anethole, beta-sitosterol, triterpene saponosides and tannins.
The seeds are rich in mucilages.

Trachyspermum ammi (Yavani), fruits (8:1) - 200 mg.
The fruits maintain the balance of the intestinal flora, help digestion, promote the elimination of intestinal gases and toxins from the body. Indian cumin seeds contain fiber, carbohydrates, anines, glycosides, proteins, fats, saponins, flavones and minerals containing calcium, phosphorus, iron and nicotinic acid.

Vernonia anthelmintica (Kalijiri), seeds (10:1) - 200 mg.
It has anthelmintic properties by inhibiting worm motility. Contains oil, brassicasterol, stigmasterol, resin, myristic acid, palmitic acid, stearic acid, oleic acid, linoleic acids, vernolic (epoxyoleic) and methyl vernolate.

Honey - 200 mg;
Sodium benzoate (preservative) - 25 mg.
Sugar - 2400 mg.
Demineralised water - până la 5 ml.

MEMO ON

Natural stimulant of memory

CLINICAL INDICATIONS:

- improving cognitive capacity, memory and increasing intellectual performance;
- supporting the nervous system in periods with intense intellectual activity;
- delays the onset of fatigue and supports the recovery of the body's energy resources in stressful situations;
- has the role of supporting pupils and students to intense mental and intellectual effort, especially during exams;
- maintains the mental and intellectual abilities of the elderly, being an adjunct in the therapy of the nervous system.

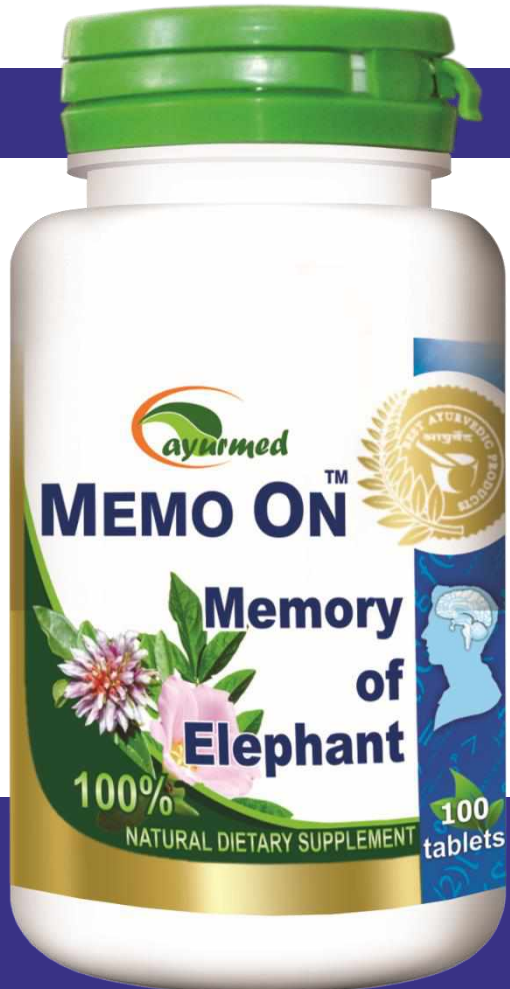

Suggested dose:

Children: half a tablet twice a day.

Adults: one tablet 2-3 times a day, for 30-60 days.

It is administered half an hour before a meal or one hour after a meal, no later than 18.00.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Store in the original package at room temperature and away from light and heat.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Bacopa monnieri (Brahmi), aerial parts (8:1) – 100 mg
Supports integrative brain functions (memory, perception, concentration) and physical-mental coordination. Contains alkaloids, brahmin, herpes, sapinosides, betulic acid, beta-sitosterol, stigmasterol, heptacosan, mono and octocosane, dotriacontane, nicotinic acid, 7-glycosides, alpha-alanine, aspartic acids, glutamic and serine.

Glycyrrhiza glabra (Licorice), root powder - 100 mg. It contains Glabridine, a polyphenolic flavonoid, which reduces the activity of cholinesterase in the brain which leads to improved cognitive functions, thinking and memory. It contains triterpene saponins, the most important of which is glycyrrhizin, present either as such or in the form of derivative compounds, such as glycyrrhetic acid; also contains phytosterols and flavonoids (licorice).

Convolvulus pluricaulis (Shankhpushpi), aerial parts (8:1) - 100 mg. It is effective in maintaining attention, concentration, ability to understand, process, systematize and retain information. Contains alkaloids such as betaine, B-sitosterol, evolvine, triacontane, pentatriacontane, scopoletin, umbelliferone, scopolin.

Emblica officinalis (Amla), fruit powder - 100 mg. It has antioxidant properties, supports the immune system, has a role in maintaining the health of the nervous and cardiovascular systems, especially the venous system. Contains vitamin C, tannins, amino acids, glutamic acid, proline, aspartic acid, alanine, cysteine, lysine, flavonoids.

Ocimum sanctum (Indian basil), aerial parts (5:1) - 40 mg. It is adaptogenic, supports the body's functioning in conditions of overload and stress. It is neuroprotective, stimulates blood circulation and protects the brain from the destructive effect of glutamate. Contains volatile oil, anethole, beta-sitosterol, triterpene saponosides and tannins. The seeds are rich in mucilages.

Celastrus paniculatus (Jyotishmati), seeds (10:1) - 25 mg. *Celastrus paniculatus* is a memory enhancer, tranquilizer, anticonvulsant sedative, analgesic and antioxidant. The active substances in the seeds help maintain the balance of neurotransmitters, increase cognitive performance, concentration and memory capacity. The main chemical compounds in the seeds are alkaloids, celastrin and paniculatin. It also contains palmitic oil, oleic, linoleic, linolenic and esters, glycerol, α -dipalmitoyl glycerol.

Yashad bhasma (Zinc) – 10 mg.
Reduces stress and improves memory, acting in the brain area responsible for learning and memory. Improves synaptic transmission.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, compaction agent, stabilizer.

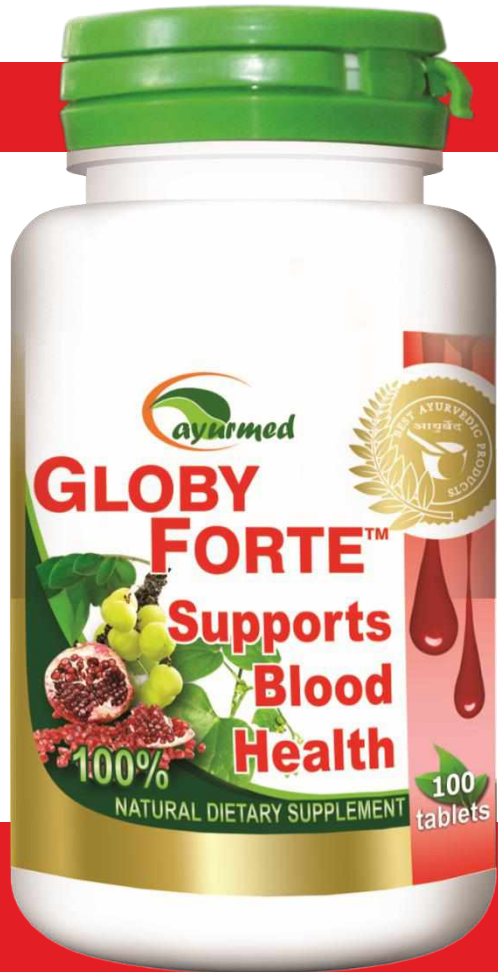

57th, Drumul Cooperativei Street, District 5 Bucharest – Romania

GLOBY FORTE

Natural iron, healthy red blood cells

CLINICAL INDICATIONS:

- natural antianemic by the intake of vitamins and minerals involved in hemoglobin synthesis;
- protects the body from oxidative stress, degenerative processes and premature aging;
- relieves fatigue and exhaustion;
- supports appetite, balances digestion, bile secretion, intestinal transit and elimination of toxins from the colon;

- stimulates the detoxification process;
- balances the immune system and maintains the body's ability to defend itself.

Suggested dose:

Children 5-10 years: half a tablet 3 times a day;

Children 11-18 years: 1 tablet 3 times a day;

Adults: 1-2 tablets 3 times a day.

It is administered 30 minutes before a meal, at least 1 month, the optimal cure for 3-6 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects or side effects at the recommended dose and use. Store in the original package at room temperature, away from light and heat. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Punica granatum (Pomegranate), fruit powder- 100 mg. It contains many minerals such as sodium, potassium, calcium, copper, iron, magnesium, manganese, phosphorus, selenium, zinc and fiber. Pomegranate is an important source of vitamins, especially A, C and E, as well as folic acid, which facilitates the absorption of iron by the body. The high iron content helps to correct anemia, increasing hemoglobin levels. Pomegranate-containing polyphenols maintain cognitive function, increase functional brain activity and improve visual and auditory memory. It has antioxidant, antiviral, anti-inflammatory and antibacterial properties.

Rubia cordifolia (Manjistha), root powder - 100 mg. Contains alkaloids, cardiac glycosides, tannins, flavonoids, phenols, anthraquinones and steroids. It is an effective detoxifier supporting the release of toxins from the liver, pancreas, spleen and other organs in the blood and then their elimination from the body. Supports the elimination of toxins from the lymphatic system.

Tinospora cordifolia (Guduchi), aerial parts(10:1) - 100 mg. It contains polysaccharides and steroids, glycosides, polyphenols, sesquiterpe-noides and aliphatic compounds. The main effect of Tinospora cordifolia is the elimination of toxins formed in the body due to malabsorption and abnormal digestion. It has immunomodulatory, rejuvenating and adaptogenic effects. It has hepatoprotective properties, normalizes liver enzymes and serum bilirubin concentration. Increases the body's ability to defend itself against infections.

Curcuma amada (Amada), rhizome powder - 75 mg. Contains volatile oil consisting of dihydrocarbons, lipids, albuminoids, minerals, starch, carbohydrates, resins, tanoids. Neutralizes free radicals and maintains the normal level of antioxidant enzymes, thus protecting the body from oxidative, degenerative and premature aging. Supports appetite, balancing digestion, bile secretion, intestinal transit and elimination of toxins from the colon.

Emblica officinalis (Amla), fruit powder - 50 mg. Contains vitamin C, tannins, phenolic compounds, amino acids, carbohydrates, flavonoids. It has strong antioxidant properties, protecting the body from oxidative stress and degenerative processes. It also supports digestion and detoxification.

Acacia arabica (Guma arabica - excipient) - 75 mg. It is a natural polysaccharide, compaction agent, stabilizer.

57th, Drumul Cooperativei Street, District 5 Bucharest – Romania

VARICOSALM

Venous elasticity, healthy circulation

CLINICAL INDICATIONS:

- restoring and maintaining elasticity, permeability and venous tone;
- supporting blood flow and normal functioning of veins, capillaries and lymphatic vessels, removing edema;
- attenuation of problems associated with hemorrhoidal blood vessels;
- protection of cells from oxidative stress and premature vascular aging.

Suggested dose:

Adults: 1-2 tablets 3 times a day.

It is administered half an hour before a meal or one hour after a meal.

Cures of 1-3 months with the possibility of repetition as needed are recommended.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain ingredients with allergenic potential. Store at room temperature, away from heat, moisture and light. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Citrus aurantium (Portocal), fruit extract(5:1) - 200 mg. It contains a complex of natural bioflavonoids that help alleviate the discomfort caused by the malfunction of the venous system. Citroflavonoids protect and help maintain the structure of the venous wall by decreasing vascular permeability and fragility. Supports blood flow and normal functioning of veins, capillaries, lymphatic vessels, eliminating edema, feeling tired and sore legs. It also eliminates the discomfort of hemorrhoidal venous insufficiency. Provitamin A reduces the oxidation of low-density lipoproteins by reducing the risk of atherosclerosis. Hesperidin and diosmin also have anti-inflammatory, antihistamine and diuretic action.

Vitis vinifera (Grape vine), grape seed extract(5:1) - 100 mg. It protects the body's cells from the attack of free radicals that it neutralizes. Maintains the integrity of elastin and collagen in the vascular wall, reduces capillary fragility. Supports the processes of collagen recovery (affected by free radicals), thus allowing arteries, capillaries, skin and tissues to remain elastic. Promotes venous and lymphatic circulation by reducing leg edema. Improves impaired circulatory function in areas of vascular dilation. Contains sucrose, dextrose, tannins, vitamin C, inositol, bioflavonoids, quercetin, resveratrol, kaempferol.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, used as a compacting agent, stabilizer

Ruscus aculeatus (Butcher's broom), rhizome powder - 100 mg. Contains ruscogenin, neoruscogenin, betasisterol, fiedelin, active ingredients that reduce hair fragility and permeability, improve blood circulation and lymphatic drainage. It helps maintain vein elasticity and prevents venous stasis. It can also be used in the acute phase of hemorrhoidal disease.

Curcuma longa (Turmeric), rhizome powder - 50 mg. It has a very strong antioxidant action, reduces lipid peroxidation. Maintains fluidity and normalizes blood flow (reduces platelet aggregation, normalizes fibrinogen levels). Curcumin has non-steroidal anti-inflammatory action. It controls blood cholesterol levels by reducing absorption and increasing its conversion to bile acids in the liver. Contributes to the detoxification of the body (amplifies the activity of detoxifying enzymes).

SLEMOL

Lose weight naturally

CLINICAL INDICATIONS:

- maintaining a normal appetite and intensifying the burning of carbohydrates and lipids at the cellular level;
- maintaining a normal metabolism and optimal body weight;
- regulation of digestion and intestinal transit;
- intensifying the elimination of toxins from the body;

Suggested dose:

It is administered to people over the age of 18: 1-2 tablets 3 times a day.
It is administered 30 minutes before main meals.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Storage conditions: in its own packaging. Store at room temperature, away from heat, moisture and light.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Garcinia cambogia (Vilaiti imli), leaf extract - 225 mg.
Reduces excessive appetite and prevents the conversion of carbohydrates into lipids and their deposition. Maintains normal blood cholesterol and glucose levels. Contains tartaric, citric, phosphoric and hydroxycitric acid.

Commiphora mukul (Guggul), resin - 75 mg.

It regulates the level of thyroid hormones by supporting lipid metabolism (stimulates fat metabolism) and increasing energy use. Prevents the conversion of carbohydrates into triglycerides. Reduces clotting and stimulates blood circulation. Contains α -pinene, cadinene, limonene, cuminaldehyde, eugenol, m-cresol, heerabolene, acetic acid, formic acid and other sesquiterpenes and acids.

Tinospora cordifolia (Guduchi), strain extract - 25 mg.
The main effect is the elimination of toxins formed in the body due to malabsorption and abnormal digestion. It is antidiabetic, antispasmodic, anti-inflammatory, antiarthritic, antioxidant, antiallergic, antistress and immunomodulator. Contains polysaccharides and steroids, glycosides, polyphenols, sesquiterpenoids and aliphatic compounds.

Piper longum (Indonesian pepper), fruit powder - 25 mg.

Stimulates intestinal transit and contributes to the absorption of nutrients in the digestive tract. General tonic, it helps to protect the body against oxidative stress and to adapt it to the stressful conditions of the environment. Contains a large number of alkaloids and related compounds, lignans, essential oils.

Glycyrrhiza glabra (Licorice), root powder - 25 mg.
It has a mild laxative effect and supports the restoration of the gastrointestinal mucosa. It contains glabridin, a polyphenolic flavonoid, which suppresses the process of fat formation and supports the enzymes involved in the metabolism of fats in the liver. Normalizes digestion and intestinal transit. The root contains triterpene saponins, the most important of which is glycyrrhizin. The root also contains phytosterols and flavonoids (licorice).

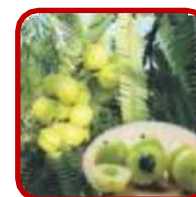

Zingiber officinale (Ginger), rhizome powder - 25 mg. It is a stimulant of the secretion of digestive enzymes in the stomach and intestines. Normalizes bile flow that helps digest hard-to-digest foods (rich in protein and fat), eliminating nausea. Supports intestinal transit and helps to alleviate the bloating sensation through the carminative effect. Contains volatile oils, phenolic compounds, vitamins (A, C, E, B1, B2, B6), minerals, antiseptic substances natural, resins, mucilages, cellulose, tannins.

Terminalia chebula (Haritaki), fruit powder - 25 mg.
Contains tannins, anthraquinone, chebulinic acid, chebulagic acid, chebulic acid, ellagic acid and gallic acid. Supports lipid metabolism, detoxification processes in the liver and normalization of intestinal transit. Phytonutrients ensure the normalization of the acidity and integrity of the gastrointestinal mucosa.

Terminalia belerica (Bibhitaki), fruit powder - 25 mg.

Normalizes intestinal transit and supports detoxification processes in the liver by maintaining the optimal functioning of the endogenous enzyme system. The bioactive components ensure the integrity of the gastric mucosa and the normalization of acidity. Contains tannins, arabinose, fructose, sucrose, rhamnose and amino acids, triterpenes and retinoic acid.

Emblica officinalis (Amla), fruit powder - 25 mg.
It has strong antioxidant properties protecting the body from oxidative stress and degenerative processes. Stimulates the endogenous antioxidant enzyme system. Supports digestion, intestinal transit and detoxification process. Contains vitamin C, hydrolyzable tannins, amino acids, carbohydrates, flavonoids, minerals (calcium, phosphorus, iron).

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, used as a compacting agent, stabilizer.

URINOSALM

For kidney and urinary tract health

CLINICAL INDICATIONS:

- maintaining the functional capacity of the kidneys and urinary system;
- attenuation of unpleasant manifestations associated with the presence of bacteria in the urinary system (frequent urination, accompanied by burning and pain);
- detoxifying the body by eliminating toxins in the kidneys;

Suggested use:

Children over 5 years : one tablet twice a day;

Adults: 1-2 tablets 3 times a day.

It is administered 30 minutes before a meal or one hour after a meal, at least one month, preferably 3 months.

Cautions: Do not exceed recommended dose for daily consumption. Keep out of the reach and sight of small children. No side effects at the recommended dose and use. The product does not contain substances with allergenic potential. Dietary supplements do not replace a varied and balanced diet and a healthy lifestyle. Storage conditions: in its own packaging. Store at room temperature, away from heat, moisture and light.

Servings per container: 30 / 60 / 90 tablets

Ingredients/tablet (500 mg):

Piper cubeba (Cubeb, Kankola), fruits (6:1) - 100 mg.
Due to its rich content of polyphenols, it has antioxidant and antibacterial action. Increases diuresis and decreases inflammation of the urethral mucosa. Stimulates blood circulation.

Boerhaavia diffusa (Punarnava), root (8:1) - 75 mg.
It has diuretic and antibacterial action, supporting the kidneys and urinary tract in case of infections. It facilitates the elimination of kidney stones and prevents the formation of others. It has antibacterial action supporting the kidney and urinary tract in case of infections.

Phyllanthus urinaria (Bhumyamalaki), aerial parts (10:1) - 75 mg.
It is antispasmodic, slightly increases diuresis and promotes the elimination of urinary stones. Supports detoxification of the body by eliminating toxins in the kidneys and hepatobiliary.

Acacia arabica (Guma arabica - excipient) - 50 mg. It is a natural polysaccharide, used as a compacting agent, stabilizer.

Crataeva nurvala (Varuna), bark (10:1) - 75 mg. It increases diuresis, lowers urine pH and prevents the formation of kidney stones in the urinary tract.

Achyranthes aspera (Apamarga), whole plant (10:1) - 75 mg.
It is nephroprotective, increases diuresis and eliminates toxins from the body. Prevents the formation of kidney stones. Contains Saponins A and B, amino acids, hentriacontane, ecdysterone hormones.

Bergenia ligulata (Paashaanbhed), root (10:1) - 50 mg.
It increases diuresis and inhibits the process of crystallization of calcium oxalate in the urinary system. It is a physiological regulator of the excretion of magnesium ions in the urine. Contains bergenin (Glycoside).
