RAW HONEY

HONEYMAN UK

packed by beekeeper

ORGANIC

Our honey is certified by a recognized certification body through a rigorous monitoring and testing system, guaranteeing its purity.

RAW

Extracted through traditional methods and coarsely filtered, our honey preserves the nutrients, high pollen content and authentic aroma.

ARTISAN PRODUCT

Differing from a mass production process, our honey is skilfully produced in small batches, with passion and care to the details.

Nature's pure flavour

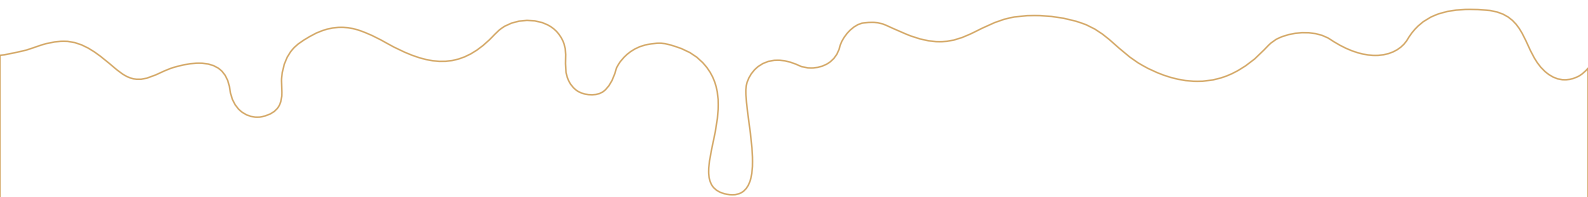

Our mission is to supply certified organic, healthy and flavoursome bee products, packed in elegant jars, to enhance each taster's experience. In order to achieve our mission, we provide only carefully selected premium-quality honey.

Our honey is extracted through traditional methods, process which maintains its nutrients, high pollen content and authentic aroma, our customers getting a perfect, rich 100% organic honey.

In addition to distinctive content, our products have a special embossed paper for label with elegant design that mimics the slow flow of our honey and the handmade wooden lid, sculpted carefully from raw beech, enriches the jars, giving them a special hue of artisan product.

We wish to provide our nature loving customers a great experience, transforming the tasting of each spoonful of honey in a delightful moment.

**ORGANIC
HONEY**

acacia

artisan product

Organic Acacia Honey

Acacia honey is delicate, with a subtle, smooth, slightly vanilla aroma, its colour being clear, of an almost transparent yellow. Collected by the bees during a short period in May and only in strict climatic conditions (temperature, humidity, atmospheric movement), this indulging honey has a unique taste, delicate flavour and appealing texture.

Our organic acacia honey comes from large natural forests located on the slow slopes of the Carpathian Mountains, in the province of Buzau, Romania, where beekeeping is practiced for centuries.

Net weight per unit (g)	420	250	125
Gross weight per unit (g)	660	440	240

**ORGANIC
HONEY**
heather

artisan product

Organic Heather Honey

Organic heather honey is amber with dark reddish shades, of an intense aroma of butterscotch, truffle and wild mushrooms, sweet taste, but at the same time, with a bitter component and salty notes. It is collected towards the end of the season, when random weather is influencing the bees' activity that's why this unique honey is often in limited quantity.

Our organic heather honey is originating from heather or *Mentha Aquatica*, located in the Small Island of Braila Natural Park, Romania, close to Danube Delta.

**ORGANIC
HONEY**
linden

artisan product

Organic Linden Honey

The linden honey, like the plant that offers it, is a strong honey with a distinctive flavour, and a clear golden colour. The strong aroma is composed of fresh woody notes and soft caramel tones, pleasantly sweet, but with a barely perceptible bitter aftertaste and a slight astringency.

Our organic linden honey comes from old-growth forests of Macin Mountains National Park, situated on the ancient territory of Dobrogea in South-East Romania.

Net weight per unit (g)	420	250	125
Gross weight per unit (g)	660	440	240
Units per box (pcs)	6	6	9
Units per pallet (pcs)	900	2058	2940
Net weight of the pallet (kg)	378	432	367,5
Total weight of the pallet (kg)	620	785	730

DID YOU KNOW?

Macin Mountains formed 300-400 million years ago were part of the oldest massif that unfolded throughout Europe from west to east. Only these mountains and Scottish Mountains still bear witness of this massif with its unique ecosystem.

ORGANIC HONEY
wild flower
artisan product

Organic Wildflower Honey

Apitherapy physicians acknowledge the multi-flower honey as a “complete” honey because it is obtained from the nectar of several plant species, combining their therapeutic power. That is why raw multi-flower honey is richer in vitamins and minerals than single-flower honey. It has an aromatic and sweet persistent taste with slight variations depending on the flowers it comes from.

Our organic wildflower honey is obtained from the fragrant meadows of Buzau Mountains, part of Carpathians Mountains in Romania.

Net weight per unit (g)	420	250	125
Gross weight per unit (g)	660	440	240
Units per box (pcs)	6	6	9
Units per pallet (pcs)	900	2058	2940
Net weight of the pallet (kg)	378	432	367,5
Total weight of the pallet (kg)	620	785	730

DID YOU KNOW?

Buzau Mountains, record a variety of medicinal plants in different forms: shrubs, bushes, wild flowers. This variety is because of different types of soils encountered here. The bees create from the nectar of these appreciated herbs a honey with a refined taste.

Organic Pollen

Each type of plant has its specific pollen as flavour, taste, colour, shape, composition. As the bees visit all the flowers of the season, the pollen granules will have colours ranging from golden yellow to dark brown and flavours that vary from one period to another and from one area to another.

One of the oldest "food supplements," bee pollen has 22 amino acids, 18 vitamins and 25 minerals, hormones, unsaturated fats, nucleic acids, these nutrients being present in a form that makes them easily assimilable

Net weight per unit (g)	100
Gross weight per unit (g)	340
Units per box (pcs)	6
Units per pallet (pcs)	2058
Net weight of the pallet (kg)	205.8
Total weight of the pallet (kg)	230

DID YOU KNOW?

In pollen there are precursors of chemical neuromediators found also in brain, substances that improve brain activity. Pollen consumption is very useful for people doing intellectual work because it can increase their working capacity and decrease the phenomena of fatigue, reducing the effects of stress.

Why choose organic products

TASTIER: Firstly, it is the 100% natural, richer taste, easily identifiable in case of fruits and vegetables where there are major differences between the taste of organic products and those obtained in conventional farming.

HEALTHIER: Organic foods contain 65% more vitamins and antioxidants than conventional foods and have the nutritional properties needed for a harmonious development. The lack of pesticides, antibiotics and genetically modified organisms help maintain a healthy lifestyle. According to Mayo Clinic, the big advantage of bio food is the drastic reduction in pesticide exposure. (www.mayoclinic.org)

BETTER FOR THE COMMUNITY: Many of the companies that are active in organic agriculture do not just work for profit; they rigorously select the source of ingredients, the production chain, fair employee pay system, etc. In organic certified production there is a great transparency of the entire process, from ingredient to final product.
